### **Experience**

#### **Web Developer at Indevia Studio, Surabaya, ID, 9/2018 – 5/2019**

I was in the team that was responsible for Indevia Addon API Service, which is a piece of all communication between client and server. I led the effort to build a feature that allows users to easily access the services. My responsibilities included the initial research, managing the services, designing the API routes, creating simultaneous transactions, and debugging the services.

#### **Co – Founder at RunUp Studio, Surabaya, ID, 9/2018 – Now**
